

OECD Database on Research into the Safety of Manufactured Nanomaterials

[Advanced Search](#)[List all projects](#)

OECD Database on Research into Safety of Manufactured Nanomaterials is a global resource which details research projects that address safety issues of manufactured nanomaterials. This database helps identify research gaps and assists researchers in future collaborative projects of the [OECD's Working Party on Manufactured Nanomaterials \(WPMN\)](#) as a resource of research information.

This database builds on the database of the Woodrow Wilson International Center for Scholars: [Nanotechnology Health and Environment Current Research](#).

OECD Database on Research into Safety of Manufactured Nanomaterials was launched for public use on 1 April 2009. [Gene](#) the OECD website.

If you have any question and/or comments on this Database, please feel free to contact us.

*Note: If your comment concerns individual project, please contact investigators of its project directly. The contact point is information.
